## Work Experience

### 2nd Year CSE Student

University college of Engineering, Kancheepuram

Jan 2022 - Present

Location

- Responsible for developing and maintaining web applications using modern technologies.

## Projects

### Heart Health AI Chatbot

2026-05-05 - 2026-05-06

Developed a domain-specific healthcare chatbot using BioMistral LLM and NeuML PubMedBERT embeddings in Google Colab. Implemented RAG-based document retrieval to provide accurate, context-aware answers to heart-related queries from a medical PDF knowledge base.

Tech Stack: Python, Google Colab, BioMistral, PubMedBERT, RAG, NLP, Generative AI.

### Cinema Ticket Booking System

2026-05-05 - 2026-05-06

Built a Cinema Ticket Booking System using C++ to simulate a real-world movie ticket reservation process. The application enables users to book tickets, manage seat availability, view movie details, and calculate booking costs. This project strengthened my understanding of C++ programming, problem-solving, and object-oriented programming concepts.

## Education

### University College of Engineering Kancheepuram

B. E Computer Science and Engineering

2029

Kanchipuram

## Skills

C and C++ Program

HTML

CSS

AWS Cloud Computing

Generative AI

Object Oriented Programming

## Certifications

### AI for business professionals

HP Life

### AI for Beginners

HP Life

### Gemini Certified Student

Google

### Build & Deploy Apps with Google AI Studio & Multilingual AI Speech App with Vibe Coding

GUVI | HCL

### Generative AI

GUVI | HCL

### C++ for College Students

Udemy

### AWS Cloud Practioner Badge

Amazon Web Services (AWS)

## Languages

Tamil

English
