Projects

Cinema Ticket Booking System

2026-04-20 - 2026-05-05

Built a Cinema Ticket Booking System using C++ to simulate a real-world movie ticket reservation process. The application enables users to book tickets, manage seat availability, view movie details, and calculate booking costs. This project strengthened my understanding of C++ programming, problem-solving, and object-oriented programming concepts.

Heart Health AI Chatbot

2026-05-24 - 2026-05-28

Developed a domain-specific healthcare chatbot using BioMistral LLM and NeuML PubMedBERT embeddings in Google Colab. Implemented RAG-based document retrieval to provide accurate, context-aware answers to heart-related queries from a medical PDF knowledge base.

Tech Stack: Python, Google Colab, BioMistral, PubMedBERT, RAG, NLP, Generative AI.

Portfolio - Website

2026-07-01 - 2026-05-05

Developed a responsive personal portfolio website using HTML and CSS to showcase skills, projects, certifications, and achievements. Designed with a modern user interface and mobile-friendly layout, and deployed using GitHub Pages.

Education

University College of Engineering Kancheepuram

B. E Computer Science and Engineering
2029
Kanchipuram

Skills

- C and C++ Program
- HTML
- CSS
- AWS Cloud Computing
- Generative AI
- Object Oriented Programming
- Java

Certifications

AI for business professionals

HP Life

AI for Beginners

HP Life

Gemini Certified Student

Google

Build & Deploy Apps with Google AI Studio & Multilingual AI Speech App with Vibe Coding

GUVI | HCL

Generative AI

GUVI | HCL

C++ for College Students
